Critical Document Title

Summary

Lorem ipsum dolor sit amet, **consectetur adipiscing** elit. Aliquam non risus in massa ornare lacinia. Etiam at ullamcorper ligula. Mauris et orci ut lectus convallis euismod. *Mauris* vitae purus congue, finibus tellus nec, lacinia felis.

Etiam eget lectus quis leo tincidunt venenatis. Duis iaculis tristique tempor. *Maecenas vestibulum* vehicula dui: objecthub.com.

Considering More Options

Nullam gravida `suscipit placerat`. Vivamus gravida fermentum magna vitae condimentum. Interdum et **malesuada fames** ac ante ipsum primis in faucibus.

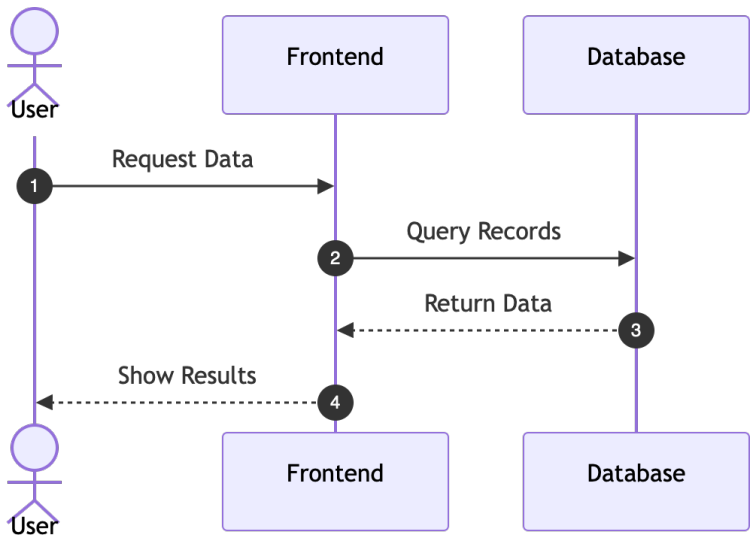

1. This is the first item
2. This is the second item
3. This is the third item

Cras laoreet tellus dolor, ac `suscipit augue` molestie a. Integer efficitur odio massa, in dictum arcu dictum in. Aliquam dapibus congue malesuada. Vestibulum dignissim mauris ~~id ipsum volutpat~~, in dignissim nisi luctus. Praesent scelerisque nisi non porttitor dictum. Etiam finibus ac libero at rhoncus.

- This is the first item
- This is the second item
- This is the third item

Lorem ipsum dolor sit amet, **consectetur adipiscing** elit. Aliquam non risus in massa ornare lacinia. Etiam at ullamcorper ligula. Mauris et orci ut lectus convallis euismod.

1. Let's see if this works also in a list
2. And here is the diagram:

>

> This is a *Mermaid* diagram rendered inlined.

Left To Do

Some items are already done, others are still open:

- ☑ Review the **summary** of the document
- ☑ ~~Remove~~ the duplicate section about `options` and verify the outcome.
- ☐ Check all links, in particular objecthub.com
- ☐ Ask for a second opinion

The final steps have to be completed in this order:

1. ☑ Collect the feedback of the reviewers
2. ☑ Merge the changes into the final text and proof-read is one more time
3. ☐ Publish the document
4. ☐ Archive the *previous* versions

Final Remarks

Nunc at dignissim lectus. Integer ligula velit, ullamcorper id rutrum vel, iaculis aliquet quam. Praesent congue viverra lorem vel faucibus.

> Cras nibh ex, lobortis a tincidunt vel, cursus a dolor. Proin accumsan a risus in venenatis. Etiam eleifend, nisi in auctor tristique, felis risus sodales nibh, eu sodales nunc diam ut sapien.

Last But Not Least

Pellentesque ac lectus aliquam, efficitur lacus eu, efficitur justo.

```
;; This is the first definition
(define foo 12)
; This is the second one
(define (bar n)
  (if (> n 12345)
      (foo 'end '(one two) (foo x) #t)
      "hello world"))
```

Aenean libero nunc, elementum at justo congue, tristique tincidunt lorem. Donec ultrices ante mi, vehicula euismod neque egestas quis.

```
/// A generic stack for equatable items.
public struct Stack<T>: Equatable where T: Equatable {
  private(set) var items: [T]
  public init(items: [T] = []) {
    self.items = items
  }
  public mutating func push(item: T) { items.append(item) }
  fileprivate var description: String {
    if items.isEmpty {
      "The stack is empty"
    } else {
      "\(items.count) items in the stack"
    }
  }
}
```

Vestibulum vitae ex ut tellus auctor mattis. Aenean eget ornare arcu. Lorem ipsum dolor sit amet, consectetur adipiscing elit.

- Morbi ut dui laoreet, euismod libero sed, tincidunt mi. Proin pellentesque tellus augue, vel volutpat nulla euismod sed.
    1. Sub-item 1
    2. Sub-item 2
    3. Sub-item 3
- Cras scelerisque ac turpis consequat vulputate. Quisque pellentesque mi a imperdiet lobortis. Nulla nec pretium dui.
- Phasellus dolor magna, feugiat et dapibus sed, sodales a eros. Aliquam eget sem non nisl viverra placerat sagittis eget tellus.

Maecenas viverra, justo nec finibus iaculis, diam turpis malesuada nulla, et pharetra nisi diam id nisi. Nam nunc purus, condimentum vitae risus tempor, gravida faucibus dolor. Fusce facilisis nisi erat, et cursus justo dignissim sed.

Advanced Features

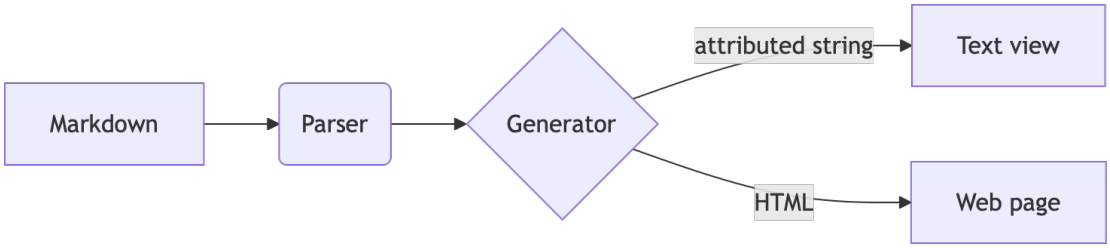

Tables

Centered	Left	Right
This text is long	More `cell` text	One
Last **line**	Last cell justo nec finibus.	Two
Ok one more	And this also	Three

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Aliquam non risus in massa ornare lacinia. Etiam at ullamcorper ligula. Mauris et orci ut lectus convallis euismod.

Mermaid Diagrams

Fenced code blocks with language `mermaid` are drawn as diagrams:

Mathematical Formulas

Formulas are typeset with KaTeX. A formula within a line is written between dollar signs, like $e^{i\pi} + 1 = 0$, or between the delimiters of LaTeX, like $a^2 + b^2 = c^2$. The solutions of $ax^2 + bx + c = 0$ are given by the quadratic formula:

$$x_{1,2} = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

A formula that is a block of its own can also be written between double dollar signs, or as a

fenced code block with language `math`:

$$\int_{-\infty}^{\infty} e^{-x^2}\,dx = \sqrt{\pi}$$

$$\begin{pmatrix} a & b \\ c & d \end{pmatrix} \begin{pmatrix} x \\ y \end{pmatrix} = \begin{pmatrix} ax + by \\ cx + dy \end{pmatrix}$$

Formulas sit on the baseline of the text, take its color, and also work in lists, quotes and tables:

1. The sum of the first n numbers is $\sum_{k=1}^{n} k = \frac{n(n+1)}{2}$.
2. Dollar signs in ordinary text, like $5 and $6, are not formulas.

> Euler's identity $e^{i\pi} + 1 = 0$ connects five fundamental constants of mathematics.

Name	Formula
Circle	$A = \pi r^2$
Gauss	$\sum_{k=1}^{n} k = \frac{n(n+1)}{2}$

This is the end.
